

To Whom It May Concern:

It is with great pleasure that I recommend Ghindaoanu Ionut Iustin as a future Junior QA Engineer employee.

I was Ionut's trainer at IT Factory where I am currently activating as a collaborator after around seven years of experience in the Quality Assurance field. My expertise is in the Telecom, Networking, Biometric Identification and Digital projection, and I have most experience in the digital projection with activity in the API testing area and also Networking.

I interacted with Ionut during the course, and he always proved responsibility and perseverance.

What I appreciated most about him was dedication towards study, his ambition, and his desire to learn and develop himself. This will help him evolve very quickly from a technical perspective.

Another thing that I think recommends Ionut is the fact that he is a team player, and has a certain attitude that makes him likeable, so I think he will make a great colleague.

That being said, I think Ionut has the potential to grow both as an individual and as an employee, and he will bring value to the company with the abilities and prerogatives I have mentioned before.

If there is any other information needed about his experience, please let me know.

Sincerely,
Barbu Madalina
